

OVERVIEW

It's a proven fact that managers in companies spend more time finding information than actually viewing it and making decisions. This is mostly the case where organizations do not possess a good BI solution with powerful report management features.

CUBOT™ has a well endowed report management tool that makes storing, viewing and disseminating information easy. It's equipped with powerful search functionality and folder based file storage features. This ensures that users can quickly pull out information no matter where it is stored

CUBOT™ also makes data portability easy by allowing users to print, email and share reports through a single user interface.

TECHNICAL SPECIFICATIONS

- Sever Operating System: RedHat® ES 3.0 or higher, Suse Linux® 9.1 or higher, AIX®, Solaris®
- OS Dependencies: Pearl with DB5® version 5, GD Graphics® Library, JVM® Version 1.4.2, UNIX® ODBC, ODBC driver for source data repository
- Client System: Internet 5.0 or higher, FireFox® 1.0 or higher, Mozilla® / Netscape® 7.0 or higher
- Database platforms: MySQL® 4.1 or higher, Oracle® 9i and 10g, IBM DB2® UDB

- Data Source: Text files, spreadsheets, XML®, ODBC or JDBC compliant databases

CUBOT™ REPORTS

- **Powerful search feature.** Simply type in keywords and pull out the correct report.
- **Periodic refreshes.** Reports are refreshed periodically with fresh transaction data so that the user always stays on top of things.
- **Set alerts.** Set alerts to stop exceptions. Iron out minor inconsistencies before they snowball into major problems.
- **Email, print or export.** Share information securely, schedule emails, print your reports to PDF or export to spreadsheet – all through one easy-to-use interface.
- **Folder based report management.** Organize information neatly in easy-to-view folders.

REPORTS BENEFITS

- **Save time and effort.** CUBOT™ saves time by extracting information when it is needed, using the search feature or by simply organizing reports in folders.
- **Secure information sharing.** CUBOT™ enables sharing of information securely by using the built-in report sharing feature.
- **Mail reports.** Through a direct link to a mail system, reports can be sent as attachments to individuals or groups.
- **Updated information everyday.** Stay on top with updated information at your fingertips.
- **Spot exceptions.** Spot exceptions using the powerful alert feature.
